

## e-Store

### The smart way to set up shop online!

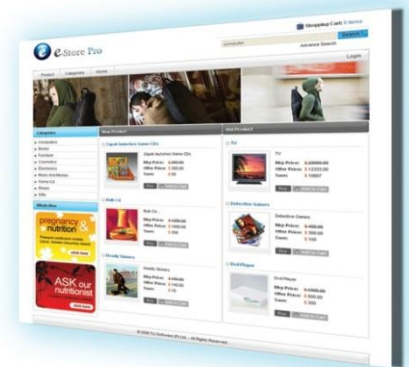

TLI Software Inc is an ISO 9001:2000 provider of IT products and software solutions. We provide affordable off-the-shelf software products and cost effective web applications that can be fully customized according to your requirements. Our software products have been developed by our highly skilled software engineers and are available in wide range of attractive licensing and support options.

### Build your own online store with products, special offers, discounts, and banner advertising.

#### End-to-End e-Commerce

In a world of changing business processes and business models, the collective value of an e-commerce solution is measured by its long-term potential and flexibility. With a stable technological platform at its core, e-Store delivers an end-to-end e-commerce solution where disparate information such as catalogue data, order information, order status, product descriptions, invoices and customer details are available through a single interface.

E-Store empowers you with a robust, scalable software infrastructure to adapt to changing business processes by making it easy to integrate with external business applications. E-Store Pro is a web-based, customizable e-Commerce store front that lets you sell goods and products on the Internet. You can start your online business from day one by setting up an e-commerce shop using TLI's e-Store that comes in Silver, Gold, and Platinum packages.
